# We can't keep it under our hat!

---

A recent Department of Commerce report shows the South leading the national rate-of-growth average in 29 of the 34 important fields of business activity covered in this new survey.

---

Bet your hat we can't! Our oft-repeated claim that the modern South is a young, fast-growing industrial opportunity-land is *fact*, not fiction. You don't have to take our word for it. A recent U. S. Department of Commerce report (name on request) covering the past decade *proves* it to be true. Just look at the figures shown here and you'll see that this is so.

This is no flash-in-the-pan growth pattern. It is the natural result of a growing and vigorous industrial area enjoying *right now* its active, vital *growing-up* years. Inevitably, it has brought about new and expanding markets for goods of all kinds . . . new opportunities for industries located here.

Why not *you*? Take advantage of this built-in "growth situation," plus the many other benefits found in the South that help lower manufacturing costs and increase production efficiency. Come South now and grow with us. The reward can be a busier, *more profitable* industrial future for you.

"Look Ahead — Look South!"

*Harry A. DeBatta*  
PRESIDENT

**SOUTHERN RAILWAY SYSTEM**

WASHINGTON, D. C.

*The Southern Serves the South*

Here are some examples of expansions in major fields of business activity from 1947-48 to 1958-59, as shown in a report recently issued by the Department of Commerce:

	PERCENT FOR THE SOUTH	INCREASE FOR THE U.S.
Dollar-value added by manufacture.....	120	90
Number of manufacturing establishments.....	35	24
Manufacturing employment .....	28	12
Dollar-value of manufacturing payrolls.....	131	97
New plant and equipment expenditures.....	65	49
Dollar-value of retail sales.....	65	53
Number of retail trade establishments.....	5	1
Dollar-value of retail trade payrolls.....	77	59
Dollar-value of wholesale sales.....	68	50
Number of wholesale establishments.....	36	17
Wholesale trade employment.....	23	13
Dollar-value of wholesale trade payrolls.....	80	59
Number of service trade establishments.....	58	46
Number of industrial and commercial firms.....	29	13
Dollar-value of life insurance in force.....	253	172
Number of motor vehicle registrations.....	117	91
Dollar-value of bank deposits.....	73	58
Production of electric energy.....	238	158
Dollar-value of personal income.....	111	101
Per capita personal income.....	74	64
Dollar-value of minerals produced.....	87	70
Cash farm income.....	23	10

# THE SOUTH'S NEW

Claghorn is dead! A new Southern accent has emerged. The region has a dynamic new voice which is being heard in industry, government, education, science, and all fields of development. This year's Blue Book salutes a group of outstanding young men who typify the region's new leadership.

## FACES OF THE NEW LEADERSHIP

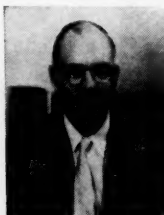

Helping to guide the course of the South, these are some of the men responsible for its spectacular development — and these men are only a cross-section of the leaders who could be selected. In nearly every community of the South, one can find similarly dedicated men who are destined to take their place in the South's new leadership.

Willis M. Anderson

# LEADERSHIP

**Trained in the most advanced principles of science and technology**

**International rather than provincial in their cast of mind**

**Dedicated to professional management concepts in business and civic affairs**

**Motivated by a strong sense of responsibility to serve the public**

**D**uring recent years, particularly in the past decade, perhaps the most significant factor in the spectacular development and broadening of the South's total economy has been the emergence of a new and dynamic type of young leadership.

These men, who have been instrumental in creating an impressive new regional image, have excelled and are continuing to gain new honors in all fields of endeavor — everything from agriculture to education and medicine, from deep scientific research to practical and constructive politics.

Beyond that, these young leaders with their strong technological and professional backgrounds have not been content to confine their activities to the South alone. They have gained national recognition, have made contributions important to the

national interest, and in many cases have been put into positions that are international in scope and influence.

Being well aware of what this progressive leadership has meant to the South, the editors of **THE BLUE BOOK OF SOUTHERN PROGRESS** this year decided to give special recognition to the men who have contributed so successfully to the region's growth and stature.

In order to do the best possible job of giving credit where it is due, the **BLUE BOOK** queried more than 300 prominent Southerners, representing a cross-section of the economy, asking them to name their choice of the men who best represented "the South's new leadership." The response to this was terrific, and while the survey could not be regarded as comprehensive, and the list certainly is by no means

complete, your editors believe that the names submitted represent a fine across-the-board example of the kind of men who exemplify this leadership.

Here, then, is a summary of results from the survey:

**Dr. A. W. Wortham**, manager of planning and management systems of Texas Instruments Incorporated, is 34 years old and a native of Athens, Texas. In addition to having held key positions in several technical enterprises, Dr. Wortham has served as educational director, vice chairman and chairman of the Dallas-Fort Worth section of the American Society for Quality Control; as midwest conference representative for the Section, a member of the National ASQC Committee on Education and Training, and is a member of the National ACQC Committee on Publicity. He is a past president of the North Texas Section of

## SOUTH'S LEADERSHIP

the National Council of ASA, is a member of the Operations Research Society of America, Institute of Mathematical Statistics, Mathematical Association of America, Institute of Radio Engineers and Sigma Xi. He has published and presented several papers and recently published a book in experimental statistics.

**Monroe A. Miller**, chairman of the board and president of Milgo Electronic Corporation, Miami, is internationally recognized as an outstanding authority in the field of analog computing. The 43-year-old executive designed, developed and manufactured both analog and digital systems used at every active Air Force Missile Tracking Range in the Miami area, at many overseas sites, and at other defense agency ranges. His latest single job at this writing was on "Project Discover" which he project-managed. Mr. Miller's company has grown from a small start five years ago to an organization with a net worth of \$2 million.

**Herman W. Lay**, founder, president and chairman of the board of H. W. Lay & Company, Atlanta, went into business for himself in 1932, using his 1928 automobile as a delivery truck. In Tennessee. Today the company that bears his name is one of the nation's largest potato chip and snack food manufacturing firms, with net sales of approximately \$28 million. There are 43 Lay sales distribution centers and 10 manufacturing plants spread over 18 states, the District of Columbia and Puerto Rico. A director of several other corporations, Mr. Lay also is a member and past president of the Potato Chip Institute International and is a director of the general management planning council of the American Management Association, as well as a leader in a number of regional and local civic endeavors.

**Governor Terry Sanford** of North Carolina was inaugurated for a four-year-term in January, 1961. A native North Carolinian, the 44-year-old chief executive has long been dedicated to good government and has captured the imagination of the state's citizenry, as well as leaders from other states, in his platform

## SOUTH'S LEADERSHIP

for continued progress. He was a combat paratrooper in World War II, a former agent of the FBI, former legislator, a past president of the North Carolina Young Democratic Clubs, a close friend of President John F. Kennedy, and has been a consistent civic leader in his home town of Fayetteville.

**James J. Ling**, president of Ling Temco Electronics, Inc., Dallas, at age 38 is head of an organization which has branches coast-to-coast and nationwide distribution of products, with an annual business volume of between \$150-160 million. Under his leadership, the business has been expanded to this point from a small beginning in 1947, the volume having been \$100,000 in that year. Mr. Ling's dedication to making his corporate creation a giant in electronics has had tremendous national and international impact, and a year ago he was featured in a long story in the Wall Street Journal. He is noted for his philanthropies and intends to devote more of his time and money to those activities in the future.

**Dr. Frank Loucks Hereford, Jr.**, professor of physics, University of Virginia, has at 38 achieved a remarkable record of accomplishments. He has received the Horseley Research Award and the President and Visitors Prize for his research activities. Dr. Hereford has given invited papers both in this country and in Europe, including a presentation last year at the International Symposium on Nuclear Physics in Switzerland, and he is a co-discoverer of the very heavy component of cosmic rays. His main work, which has brought widespread recognition, has been on the interaction of polarized gamma rays, ionization and energy loss of high energy electrons, and neutron scattering. He has served several times on the Fellowship and Fulbright Fellowship Committees of the National Research Council.

**Kemmons Wilson**, chairman of the board, Holidays Inns of America, Inc., is a native of Osceola, Arkansas, and has his headquarters in Memphis. He began his business career with \$50 which he borrowed to purchase a few secondhand pin-ball machines, while today he heads an organization which is the world's largest system of its type. Mr. Wil-

son is president of three other corporations, a director of several more, and prominent in Memphis and Tennessee civic affairs.

**President Frank A. Rose** of the University of Alabama is also a former president of Transylvania College and is still a member of the board of curators of that institution. In addition to his active leadership in a number of regional educational activities, he was named in 1955 as one of the 10 outstanding young men in the United States and was that year a Chatauqua Lecturer in New York. Dr. Rose is a member-at-large of the Executive Council, Omicron Delta Kappa; a member of the Air University Board of Governors, and in 1959 was a delegate, United States Committee to the Atlantic Congress, NATO.

**Mayor Willis M. Anderson** of Roanoke, Virginia, is an outstanding example of the kind of young men who are emerging on the political scene in the South's cities. He was, upon his election in 1958, the youngest councilman in the history of the city, and when he took office as mayor in September, 1960, was at age 31 the city's youngest chief executive. He has been honored by the Junior Chamber of Commerce as Young Man of the Year, is a member of the Virginia Bar, and a leader in many civic activities.

**Manes R. Lientz**, vice president of Union Bag-Camp Paper Corporation, is manager of the company's Savannah operation. Mr. Lientz, who is 47, has contributed much to the civic and social life of Georgia and the region. Prominent in the paper industry for many years, he is immediate past president of the Technical Association Pulp and Paper Industry, Inc., an international group of technical men with a membership of approximately 15,000.

**Dr. Robert Q. Marston**, assistant dean of medicine at the Medical College of Virginia, will become director of the University of Mississippi Medical Center and dean of the medical school on July 1, 1961. Dr. Marston, 38, is a former Rhodes scholar at Oxford and for five years pursued research as a Markle scholar. His major investigative efforts for which he has received widespread recognition are in the field of virology, and he is regard-

## BLUE BOOK STATISTICAL EDITOR

Responsible for the statistical material in the Blue Book of Southern Progress, Caldwell Walker is an unusually talented individual with a broad range of experience in commercial and industrial matters. One of Conway Publications' staff decided to investigate Mr. Walker's background and came up with this brief sketch, appropriately done in a humorous vein, matching Mr. Walker's own fine sense of humor:

CALDWELL WALKER was born in 1898 on a Kentucky farm when manufacturing in the South was still but a gleam in Grady's eye. His earliest career was naturally in agriculture, the first few years of which were spent in milking cows and spreading manure.

At an opportune time he was able to slip into Center College and managed to obtain a Master's degree in Journalism virtually undetected. After school he tried a year as Principal of a High School, but left with the conviction that he was not cut out to monitor 18-year old gals born in Ole Kaintuck where the horses are pretty and the women are swift. Manufacturing, meantime, was cautiously slipping a foot into the door of Southern Tradition. Principal among these, perhaps, was Moonshining. Though young Walker exhibited considerable interest in this direction, there were rumblings of forthcoming prohibition. Entry into that industry was therefore deferred, and a related field was chosen—Lumber manufacturing.

Walker's activities over the next twenty years included business connections in a wide variety of industry, until after World War 2 he returned to the field of Journalism. In 1954 he joined the staff of Blue Book and Manufacturers Record. He has often expressed keen enjoyment over his duties and says there is no substitute for business experience when it comes to analyzing business conditions.

ed as being typical of the current generation of outstanding medical scientists in the South.

**George Watts Hill, Jr.**, president of Home Security Life Insurance Company, Durham, North Carolina, was a member of the Durham City Council 1955-1957 and of the North Carolina State Legislature 1957-1960. Since 1950, 34-year-old Mr. Watts has been a vice president of the Durham Bank & Trust Company, director of the Security Savings and Loan Association, the Merchants Association, Home Security Life, the Pennsylvania Exchange Bank of New York and Aeronautical Electronics. While in the General Assembly he served as vice chairman of the joint appropriations subcommittee, chairman of the higher education committee of the House, and was a member of 10 other committees. In Durham he is a leader in many civic organizations.

**Dr. Alvis M. Holladay**, president of International Electronic Industries, Inc., Nashville, after receiving his Ph.D. degree taught chemistry

at Peabody College, then founded his own firm in 1953. Since that time International Electronic has enjoyed steady growth and today is said to be the largest and most complete facility in the world for manufacturing capacitors designed primarily for transistor circuitry. Dr. Holladay, 46, developed the world's first "plug-in" type miniature electrolytic capacitor, the first miniature multiple common negative capacitor, and the first miniature common positive capacitor. Some of his special capacitors have been adopted exclusively for use in certain missiles. He is a member of the American Chemicals Society, Tennessee Academy of Science, Institute of Radio Engineers, and is a fellow of the American Association for the Advancement of Science.

**Dr. Walter Buckingham**, director of the School of Industrial Management and professor of economics at the Georgia Institute of Technology, did post-doctoral work at the University of London in England. He is consultant to the U.S. Senate-

## CHOICE PLANT SITES IN THE SEABOARD SOUTHEAST

Along the thousands of miles comprising the Seaboard Air Line Railroad system, there are numerous plant sites, both large and small, where labor is plentiful and where conditions are highly favorable for profitable industrial operations.

It is in this area that industry has registered such outstanding growth in the past two decades. For a new plant or branch operations let us help you select a site in the Seaboard Southeast — the proven ground for industry.

An expression of your requirements will bring prompt recommendations, supported by detailed survey.

Address:  
Warren T. White  
Assistant Vice President  
Seaboard Air Line Railroad Company  
Richmond 13, Virginia

## SOUTH'S LEADERSHIP

House Economic Committee and U.S. House of Representatives Education and Labor Committee; former executive secretary of the Southern Economic Association, and impartial arbitrator of labor-management disputes in steel, textile, automobile and paper industries. He also has had several papers published and is consultant to Southern Bell Telephone and Telegraph Company, Duke Power Company, and other firms. Dr. Buckingham is 37.

**Dr. William Lewis Nobles**, dean of the Graduate School at the University of Mississippi and professor of pharmacy and pharmaceutical chemistry, has through his research made important contributions to the advancement of the profession of pharmacy. More than 35 of his articles have been published in professional journals and he also has written a text. Current research is devoted to work on treatments for cancer, tuberculosis, mental illness, hypertension, hypothyroidism, amoebic dysentery and malaria. Other activities of the 36-year-old educator include being secretary-treasurer of the Mid-South Pharmaceutical Research Foundation; member of the executive council of Rho Chi, national honor society in pharmacy, and chairman, membership and nominating committee of Scientific Section of the American Pharmaceutical Association.

**Dr. Robert Alan Charpie**, director of the Reactor Division, Oak Ridge National Laboratory, has held several positions of international significance. At the First International Conference on the Peaceful Uses of Atomic Energy, Geneva, Switzerland, in 1955, the 36-year-old educator was scientific secretary, editor-in-chief of proceedings, author of Preliminary Agenda, and first assistant to the United States member of the Seven Nation Advisory Committee. At the second International Conference in Geneva, in 1958, he was coordinator of the U.S. Fusion Research Exhibit. He also has a number of published works in the nuclear energy field, and in 1955 was named by the Jaycees as one of the nation's 10 outstanding young men. ORNL is operated by Union Carbide Corporation for the Atomic Energy Commission.

**Wilson A. Reeves**, chief, Cotton

# INDEX OF SCIENTIFIC ACTIVITY

One of the best gauges of research progress in the South is the annual survey of chemical literature contributed to the Blue Book by Dr. Sampey and his associates. The latest study reveals continued gains during 1960.

By John R. Sampey, Furman University

A check on **Chemical Abstracts** disclosed that fifteen southern states produced 4359 abstracts during 1960 in this key to the world's chemical literature. This averages better than 360 articles a month, and surpasses the previous high record of 4259 publications of 1959.<sup>1</sup> Eight southern states show a gain over the previous year, six record a loss, and one tied its own 1959 figure. States registering the largest gains were: Louisiana advanced from 228 abstracts to 267; Maryland from 1119 to 1165; North Carolina from 317 to 357; and Texas from 637 to 660. The largest decreases were with Georgia (from 186 to 156) and Oklahoma (214 to 192).

Academic institutions continue to lead the way in published research (Table II). Impressive gains over 1959 are recorded by Georgia Tech. (increase from 23 to 41), N. C. State (66 to 85), U. of N. C. (62 to 88), and U. of Tex. (245 to 263). Emory dropped from a high of 82 in 1959 to 37 publications. A study just released on chemical research in southern universities shows that two-thirds of academic research is concentrated in just fourteen institu-

tions for the decade, 1950-1960.<sup>2</sup>

It is estimated that 60% of scientific research in progress in the nation's colleges and universities is government supported.<sup>3</sup> Laboratories of the Federal government are also making significant contributions. Government laboratories of Alabama increased their publications in **Chemical Abstracts** from 25 in 1959 to 40 in 1960; in Kentucky the gains were from 16 to 37, and in North Carolina from 4 to 15. The mammoth Federal laboratories of Maryland registered a gain from 766 to 788 within a year.

Texas, Oklahoma and West Virginia continue to lead in industrial research. The industrial laboratories of North Carolina made a gain from 15 publications in 1959 to 33 in 1960, while those of Oklahoma dropped from 90 to 63 within a year.

## SOUTH'S LEADERSHIP

(Continued from Page 10)

Finishes Laboratory of the U.S. Department of Agriculture's Southern Utilization Research and Development Division, New Orleans, is a good example of Southern leaders in agricultural research. An internationally known authority on the chemical modification and finishing of cotton, he was awarded the USDA Superior Service Award in 1954 for developing an outstanding flameproofing treatment for cotton textiles. In 1960, jointly with two co-workers, he again received a USDA Superior Service Award for discovering and developing a new improved method for using certain phosphorus - containing compounds to impart durable flame resistance to cotton fabrics for civilian, industrial and military use. This new process has been acclaimed by textile scientists in the U.S. and abroad. Mr. Reeves, 42, is a member of the American Chemical Society, American Association of Textile Chemists and Colorists, and Scientific Research Society of America.

**Lee Price**, vice president, The Coca-Cola Company, Atlanta, a former special agent for the FBI, is past president of the U.S. Junior Chamber of Commerce, past director of the Chamber of Commerce of the United States; director, Effective Citizens Organization; director, Grocery Manufacturers of America; member, American and Georgia Bar Associations, as well as the Public Relations Society of America, and holds official positions with a number of local civic and educational organizations.

**Martin Goland**, president and director of the Southwest Research Institute, San Antonio, is chairman of the Research Advisory Committee on Aircraft Structures of the National Aeronautics and Space Administration; advisory panel, Committee on Science and Astronautics, U.S. House of Representatives; on Brittle Fracture Committee, National Research Council, and is a member of several other national societies. Mr. Goland holds patents on automatic measuring apparatus and methods, and others are pending. He is the author of numerous publications in the engineering sciences field. Mr. Goland is 41.

**Roger Millikin**, president of Deering, Milliken & Company, a giant

textile enterprise, resides in Spartanburg, South Carolina. Internationally known in the textile field, Mr. Milliken has contributed tremendously to the industrial, scientific, educational, cultural, civic, religious and political life of the South and is current chairman of the board of the Institute of Textile Technology. Among his many other activities, Mr. Milliken is chairman of the board of trustees of Wofford College, and that institution's new science building is named for him. His company's textile research facility at Spartanburg is regarded as one of the finest in the world.

**Dr. Andrew D. Suttle, Jr.**, director of the Industrial and Technological Research Commission of Mississippi, Jackson, is on leave from Humble Oil Company. He returned to his native state primarily because of his interest in using the salt domes of Mississippi for a series of underground nuclear explosions by the AEC. In addition to these studies, he will investigate the possibilities of using much smaller explosions to open up the channel of the Mississippi River to Vicksburg and beyond; and, also, for possible use when connecting the Tombigbee and Tennessee Rivers. Should these ideas be feasible, they will be of great economic value on a national scale.

**Doyle Conner**, Florida Commissioner of Agriculture, has had at the age of 33 a remarkable career. When his father was called to an assignment during World War II, Mr. Conner took over management of the family farm at the age of 12. He subsequently served as president of the local FFA chapter at Starke, Florida, then state president and national president of FFA. Shortly after World War II he flew to Washington to broadcast over the "Voice of America," and in 1950 was selected by the Florida Jaycees as one of the five outstanding men in the state. In 1960 he was named as one of the nation's 10 outstanding young men. Mr. Conner was elected to the Florida House of Representatives at age 21, while a sophomore at the University of Florida, and was named for a second term while still in school. At 23 he became chairman of the Agriculture Committee of the House,

a post he held for two terms. In 1955 he was elected Speaker of the House, being the youngest representative ever selected for the post.

These men were selected from the names submitted to show as broad a cross-section as possible of the men from the South who have gained recognition and made substantial contributions on a national and international scale and to show some indication of the broad and constructive influence of this young Southern leadership.

Space limitations will not allow use of biographical data on all the men whose names were submitted in the survey, and the omission of such data in the list which follows does not imply that these men are any less important in the leadership picture than those that were cited as examples.

Thus, here are additional names suggested for recognition as being a part of the South's New Leadership:

**Dillard Munford**, Atlanta, president of the Munford Company and Munford Do-It-Yourself Stores, Inc., and newly-elected national president of the Young Presidents Organization.

**John B. Connally**, Texas native and newly-appointed Secretary of the Navy in the Kennedy Administration.

**Jim Walter**, Tampa, president and founder of Jim Walter Corporation, nationally known builder of shell homes.

**William B. Harrison**, director of Research Reactor Project, Engineering Experiment Station, Georgia Institute of Technology, whose current fields of interest are heat transfer, fluid mechanics and nuclear reactor technology.

**William D. Manly**, Associate Director of the Metallurgy Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.

**Erwin Zaban**, Atlanta, vice president, Zep Manufacturing Company.

**Milton Weinstein**, Atlanta, president, National Linen Service Corporation.

**Jerry A. Burke, Jr.**, vice president, Texaco Experiment, Inc., Richmond.

**W. C. Windsor, Jr.**, Dallas, president of Windsor Properties, Inc.,

## SOUTH'S LEADERSHIP

and current president of the Southern Association of Science and Industry.

**Ben H. Carpenter**, chairman of the board and of the executive Committee of Southland Life Insurance Company, Dallas.

**Robert Henry Stewart III**, president, First National Bank of Dallas.

**William Griswold Smith**, Greensboro, N. C., head of Wise Homes, Inc.; First Southern Company, parent organization for 64 independent consumer loan companies; Twentieth Century Life Insurance Company, and several other firms.

**Robert W. MacVicar**, vice president in charge of academic affairs and dean of The Graduate School, Oklahoma State University, Stillwater.

**Charles A. Long, Jr.**, vice president, Sullivan, Long & Hagerty, building firm headquartered at Bessemer, Alabama.

**A. W. Vogtle, Jr.**, Birmingham, president of Southern Electric Generating Company.

**Harliee Branch, Jr.**, president, The Southern Company, parent firm of the Georgia, Alabama, Gulf and Mississippi power companies. Mr. Branch is a past president of the Edison Electric Institute.

**Frank P. Samford, Jr.**, Birmingham, president of Liberty National Life Insurance Company.

**Jack Kenny Williams**, dean of Clemson College, and Floyd Irving Brownley, Jr., head of the Department of Chemistry at Clemson.

**Stuart Sanders**, Roanoke, president of the Norfolk & Western Railway.

**Marvin Sutherland**, Richmond, director of the Virginia State Department of Conservation and Economic Development.

**W. Thomas Rice**, Richmond, president of the Atlantic Coast Line Railroad.

**George Grasham Johnson**, Opp, Alabama, president of Public Libraries Division, Alabama Library Association.

**Dr. John F. Baxter**, Gainesville, professor of general chemistry, University of Florida, who is also active with educational television.

**Max G. Gergel**, Columbia, S. C., founder and head of Columbia Organic Chemicals.

**E. Craig Wall**, Conway, S. C., prominent forester and lumberman,

## COAST LINE

~~WORRY  
EXTRA COST,  
DELAY~~

with UNION REALTY COMPANY'S

### "COMPLETE PACKAGE PROPOSAL"

Union Realty Company is the South's largest industrial development organization. Union Realty Company is fully and best equipped to serve you with their own Architectural and Engineering Departments, extensive grading and excavation equipment, and their own construction company. With its complete organization, Union Realty Company can submit a "COMPLETE PACKAGE PROPOSAL" on either a Lock-and-Key Lease or Sales Basis. This will eliminate the worry, extra cost, and delay entailed in the separate selection of site, preparation of plans, taking of bids, and in the coordination of architect, grading contractor, building contractor, railroad company, city authorities, and the many other parties involved.

Union Realty Company owns more than 30,000 front feet of the finest industrial sites in and around Memphis and is able to serve you throughout the South. Properties are available to accommodate industries of unlimited size. Union Realty Company can furnish immediate office space and public warehousing space for use during the period of building.

Be best served with Union Realty Company's "COMPLETE PACKAGE PROPOSAL."

Layout, plans, and quotations provided promptly on completely confidential basis.

For further information write, wire or phone

## SOUTH'S LEADERSHIP

is president of Canal Wood Corporation. Altogether, Mr. Wall has 15 corporations covering many phases of development work, production and marketing.

**William N. Wilkerson**, Memphis, is president of John T. Everett & Company; president, W. N. Wilkerson & Company; president, Diversified Plastics, Inc.; president, Reserve Steel Company, and executive vice president of Production Tooling Company and various subsidiaries.

**Dr. Michael H. Mescon**, Atlanta, consultant in human relations, The Bank of Georgia, and associate professor of management, Georgia State College of Business Administration.

**Thomas M. Brownlee**, executive vice president, Greater Columbia Chamber of Commerce, Columbia, S. C.

**Thomas I. Storrs**, Greensboro, N. C., executive vice president, North Carolina National Bank, and bank economist, writer and lecturer.

**Edward S. Hamilton**, Charlotte, vice president, North Carolina National Bank, and Louis W. Henderson, senior vice president of the bank.

**Robert N. Hoskins**, Richmond, general forestry agent, Seaboard Air Line Railroad Company.

**Edward L. Rankin, Jr.**, manager, Raleigh, N. C., office of John Harden Associates, and former secretary to ex-Governor Luther Hodges of North Carolina, who is now Secretary of Commerce.

**Edgar Finley Shannon, Jr.**, Charlottesville, president of the University of Virginia.

**Dr. Harry Sisler**, Gainesville, chairman of the Department of Chemistry, University of Florida.

**Robert E. Stiemke**, professor and director, School of Civil Engineering, Georgia Institute of Technology.

**DuPree Jordan, Jr.**, Decatur, Georgia, editor and publisher of two weekly newspapers, The West End Star and The North DeKalb Record.

**Dr. Edwin Davies Harrison**, Atlanta, president, the Georgia Institute of Technology.

**Phillip W. Moore**, Miami, president of First Research Corporation, and past president and chairman of the board of trustees of the Southern Association of Science and Industry.

# BASIC REGIONAL REFERENCE DATA

Issued annually since 1909, the Blue Book statistics afford a continuing guide to the development of the South. Each of the following tables should be self-explanatory. No doubt, every reader will make his own interpretation of trends and draw his own conclusions regarding future opportunities.\*

**"Everybody is Ignorant, only on Different Subjects" — Will Rogers**

The New 96th Year Blue Book  
Reports All Textile Plants!

Old books are obsolete — expensive to use and unreliable! An enormous number of changes and great mass of new data is now available.

Davison's Textile Blue Book reports the entire textile manufacturing industry with dyers and finishers, all allied firms and dealers. The mill reports give details on each plant — date established, capital, executives' names, machinery operated, goods made and number of employees, as well as much other data. United States and Canada complete!

All Cotton and Woolen Mills are also Classified by Products made!

All Cotton, Wool, Waste, Yarn and other Dealers are Reported.

New Index to all cotton merchants, shippers, brokers, dealers, etc. in U. S. A. arranged alphabetically by name. Thumb indexes for instant reference to any section. Gold and cloth bindings. Easy to read type on quality paper.

For selling—for buying—for reference and for mail campaigns, in these changing textile days—you need this latest revision of the entire trade.

1961 96th Year Deluxe office edition .....\$9.75  
1961 Latest Salesman's edition (mills only) .....\$5.75

"Don't be ignorant on any part of  
the Textile Industry."

## ALABAMA

Alabama's current governor is John Patterson, Democrat.

Alabama's population in 1960 reached 3,267,000, up from 3,062,000 in 1950, 2,833,000 in 1940, 2,646,000 in 1930 and 2,348,000 in 1920.

The state ranks first among the Southern states in primary metals manufacture, second in rubber goods, third in both wood products and leather goods and fourth in textiles. New plants announced in the state during the past year include Armour's plant at Cherokee to make fertilizing chemicals, to cost \$60 million and to employ 200. Other large plants are W. F. Dickey Clay Manufacturing Company's \$4¼ million installation at Bessemer to produce pipe, and Electric Auto-Lite's multi-million dollar plant in Decatur to employ 400-500 and to produce electric appliance parts.

Topographically the State presents unique diversification. In the extreme south is the coastline along the Gulf of Mexico with flat sandy land. Somewhat farther north begins a stretch of land known as the Black Belt which is extremely fertile. Still farther north is the coal and iron bearing section. The northern part of the state makes up part of the Tennessee Valley region and displays great scenic beauty.

## LEADING INDUSTRIES

The following list of Alabama manufacturers employing more than 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Alabama State Chamber of Commerce in Montgomery, and various chambers of commerce and local development groups throughout the state.

## ARKANSAS

The Governor of  
Arkansas is Orval  
E. Faubus, Demo-  
crat.

Arkansas population was 1,786,000 in 1960 as compared with 1,910,000 in 1950, 1,949,000 in 1940, 1,854,000 in 1930 and 1,752,000 in 1920.

Arkansas ranks fourth among the southern states in the manufacture of lumber and wood products, and seventh in furniture, petroleum and coal products and miscellaneous products including ordnance.

Leading new plants announced in the course of 1960 include Borg-Warner's Norge Division gas appliances plant at Fort Smith to cost \$10 million and to employ 2,000. In McGehee, Potlatch Forests, Inc. is putting up a \$35 million plant to make paper board and to employ 600 people. In Osceola, the American Greeting Card Company is putting up a \$3 million plant to make gift wrappings; it will employ 600 people. The Hot Springs plant of National Rejectors, Inc. will make vending machines; it will employ 600 and cost \$2½ million. The Brinkley plant of Wagner Electric will cost a million dollars and will employ 400.

Topographically the State falls into four general sections: the Ozark Mountains stretching across the northern part; next southward the broad, fertile Arkansas River Valley; then the Ouachita Mountains in the south. Along the eastern border of the state lies the Mississippi River Delta, rich in cotton, corn, rice and sweet potatoes.

## LEADING INDUSTRIES

The following list of Arkansas manufacturers employing more than 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Arkansas Industrial Commission in Little Rock, and various chambers of commerce and local development groups throughout the state.

## BIG REASON

*why Industry likes  
Northwest Florida*

A rapidly expanding consumer market, an abundant supply of fresh water, lower building costs... and the near perfect year 'round climate—all have contributed to this area's swift industrial rise. Florida is a magic name, too, to job seekers—the kind of workers that industry wants and needs.

Come on down and see for yourself. Or, write us for trustworthy information about opportunities for YOUR business in sunny Northwest Florida. Address P. O. Box 1151, Pensacola, Florida.

\* You and your employees are just minutes away from fabulous deep-sea fishing adventures and surf-bathing when you live and work in sunny Northwest Florida. \*

## GULF POWER COMPANY

SERVING NORTHWEST FLORIDA

## FLORIDA

Farris Bryant, Democrat, is the current governor of Florida.

Florida's population in 1960 mounted to 4,952,000, and the state took second place among the Southern states in population. Previous figures are 2,771,000 for 1950, 1,897,000 for 1940; 1,468,000 for 1930 and 968,000 for 1920.

Florida now leads the South in the production of miscellaneous manufactures including ordnance items. It is second among Southern states in printing and publishing; third in stone, clay and glass products; and fourth in food products, paper and pulp, tobacco products, fabricated metals and instruments.

Leading plants in the state announced during 1960 include the Univis Lens Company in Fort Lauderdale which will employ 2,500 people in a 100,000 square-foot building. In Palm Beach Gardens, RCA is putting up a \$4½ million plant to produce computers; it will employ 1,000. The Florida Gulf Fiber Company announced a \$13½ million plant to produce corrugated paper board in Port St. Joe. In Tampa, National Gypsum will build a \$6 - \$8 million plant to manufacture wall board and to employ between 150 and 200. Piper Aircraft plans a \$650,000 plant in Vero Beach to employ 500-600.

Chief raw materials are sugar cane, citrus fruits and tobacco, and phosphate rock. With substantial forest resources, Florida is a large producer of pulpwood, lumber and resinous chemicals. Also, the state produces livestock products, vegetables both for fresh market and for canning, and field crops. Fresh water resources are among the best in the nation.

## LEADING INDUSTRIES

The following list of Florida manufacturers employing 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK

files were the Florida Development Commission, in Tallahassee and various chambers of commerce and local development groups throughout the state.

## IN FLORIDA

### YOUR COMPANY TO JOIN WITH US IN PINELLAS COUNTY

Here's one of the few areas in America where it is possible to attract personnel in every category without difficulty.

Why? — No executive or employee need be more than 15 minutes away from home and garden, from fresh and salt water, fishing, bathing, boating, water skiing... no more than 15 minutes away from schools, churches, shopping centers, recreational and social activities.

All this, plus a favorable business climate...and SUN-sational living all year, in this enchanting land of flora and fauna.

Executive decisions, after extensive site location surveys in many areas of the nation, have resulted in major companies locating here. Their managements will gladly give you the result of their findings.

**NOTE:** Persons seeking positions please write Florida State Employment Service, 1004 First Avenue North, St. Petersburg.

For complete information communicate in confidence with:

# HOW TO OUTBID YOUR COMPETITION FOR SCARCE, HIGHLY SKILLED PEOPLE

Bid Geographically, Not Economically!  
 Attract Personnel With the  
 Proved Pulling Power of a Job in...

## DAYTONA BEACH, FLORIDA

If you hire highly skilled, hard-to-hold people, and if you're reaching the point where luring them with added economic incentive is no longer practical, consider the advantages of a geographic bid for their services.

Daytona Beach, Florida, has repeatedly demonstrated its uncanny magnetism for highly skilled people. Daytona's status as one of the world's leading resort areas gives it a marked advantage over other communities seeking industrial growth. Daytona's advantage is a simple one — PEOPLE WANT TO LIVE THERE! This means that workers place a higher value on and take more interest in their jobs.

Let us tell you the complete story of Daytona's desirability. We'll be happy to document our claim of demonstrated success and discuss the specialized personnel needs of your business.

**IF YOU'RE SERIOUS ABOUT RELOCATING OR EXPANDING IN THE DAYTONA BEACH AREA, FILL US IN ON YOUR PERSONNEL NEEDS. WE'LL DEMONSTRATE, AT OUR EXPENSE, THE TREMENDOUS PULLING POWER OF THE DAYTONA AREA FOR ANY SPECIALIZED SKILL YOU REQUIRE.**

Having solved your personnel problems, you may find that management duties, too, are more pleasant when you live at Daytona Beach.

DAYTONA BEACH AREA COMMITTEE OF 100  
 CHAMBER OF COMMERCE BUILDING, SECTION 505  
 DAYTONA BEACH, FLORIDA

— Please send me your economic survey of  
 the Daytona Beach Area.  
 — Please contact me for a confidential  
 discussion of specialized personnel needs  
 in my business.

## FIRST IN FLORIDA IN FOREIGN COMMERCE

... and center of Florida's  
largest industrial market

## TAMPA

Complete, modern facilities for handling all bulk and general cargo commodities and a full 34-foot main channel make Tampa an ideal location for shipping operations. Over 22,700 linear feet in deep water frontage are intensely developed, and port expansion has made more land available.

The Multi-County Tampa Industrial Market is by far the largest in Florida and in rate of growth it is first among all major industrial markets in the nation.

## SEE THE SITES OF FLORIDA

See for yourself why Florida is one of the most rapidly growing industrial areas in the nation. Investigate the unlimited opportunities for investment in this gateway state for continually expanding markets throughout the southeastern United States and Latin America.

A yardstick of Florida's progress is Florida Power & Light Company's accelerated growth, which has anticipated the industrial development of Florida for many years. Florida Power & Light Company's new expansion program, the most ambitious in its history, is indicative of things to come.

Go site-seeing in Florida. Sooner or later you'll want to join us.

West Palm  
Beach

MINNEAPOLIS-HONEYWELL'S  
General Manager,  
W. W. Martenis, says:

## "EYE-OPENING!"

"It's really been eye-opening the way our West Palm Beach location has aided us in attracting key technical personnel. And the way all sectors of the business and civic community have cooperated with us in opening up here has been just wonderful."

LANMAN ENGRAVING  
COMPANY'S President,  
T. Halter Cunningham, says:

## "TREMENDOUS!"

"We make color plates for letterpress and lithography in four plants across the country. Only in West Palm Beach has location proved a tremendous advantage in key personnel recruitment and our air transportation problems here are virtually non-existent."

FRANKLIN SYSTEMS'  
President,  
Henry C. Gibson, says:

## "SUPERB!"

"West Palm Beach has proven to be superbly suited to our needs. We design and manufacture electronic and electro-mechanical systems. For that we need top caliber personnel and an unfailing transportation system. We got them both in West Palm Beach plus so much more."

These direct quotations will give you just a few of the many reasons why you should consider West Palm Beach; unexcelled air transportation, available manpower, natural gas, ample electric power, plant sites, all in good supply. The deep water port handles overseas shipping. The climate is delightful. The off-hour diversions are splendid and plentiful. Think about your plant in West Palm Beach.

## GEORGIA

The present governor of Georgia is Ernest Vandiver, Democrat.

Georgia's 1960 population reached 3,943,000, a substantial gain over the 1950 population of 3,445,000; in 1940 the population was 3,124,000, in 1930 — 2,909,000, and in 1920 was 2,896,000.

Georgia leads the South in manufactures of apparel and paper and pulp products; it ranks second in food and beverage items and lumber and wood products. It ranks third in textiles and transportation equipment.

New plants announced during 1960 for Georgia include: The Southern Land, Timber and Pulp Corporation, which is building a \$42 million plant at Blakely to employ 500. In Atlanta, Sherwin-Williams is building a \$4 million paint plant to employ 225. The Riegel Paper Corporation is building a \$2 million plant in Chamblee to make paper board. The American Home Products Plant in Doraville will measure 200,000 square feet and employ 320; it will make waxes, polishes and insecticides. Knox Glass has a multi-million dollar glass container plant underway in Forest Park.

The state falls into three general sections topographically. The northern part constitutes part of the long Appalachian range of mountains. In Georgia these mountains are known as the Blue Ridge.

The remainder of North Georgia is part of the Piedmont Plateau, the most densely populated and industrialized part of the state.

The entire southern part of Georgia is a low plain reaching down to the Atlantic on the East and to Florida in the South. This section is rich in agricultural products and timber, and also is a recreational region of considerable note.

## LEADING INDUSTRIES

The following list of Georgia manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Georgia State Department of Commerce in Atlanta, and various chambers of commerce and local development groups throughout the state.

SCIENCE CENTER University of Georgia Athens, Georgia

## *the Eyes of Science are on* **GEORGIA'S** **RESOURCES in RESEARCH**

Georgia is opening the eyes of the world to new wonders in Science. As a result of Georgia's record appropriations for education, young eyes will look deeper into the world of the future . . . and skilled scientists will discover broad, new horizons for the betterment of man and industry.

**MATHEMATICS / GEOGRAPHY**  
**LIVESTOCK / POULTRY**  
**FOOD / BIOLOGICAL SCIENCES**  
**GEOLOGY / PHYSICS**  
**CHEMISTRY / TECHNOLOGY**

For 150 years, the University of Georgia has followed a tradition of scientific achievement. Today, with its \$12,500,000.00 Science Center, a new era of education and research opens vast opportunities for better living in an ever-changing world.

The University of Georgia's Science Center is dedicated to the proposition that scientific achievement is without real meaning unless it is supported by the arts, the humanities and the professions.

The Science Center is just one phase of Georgia's forward-planning to provide scientifically equipped manpower for industrial research and product development.

*S. Ernest Vandiver*

## Prestige Location At Atlanta Ready-Built Plants For Lease Sites From 1 To 30 Acres For Sale

Industrial utilities with capacity for many new plants and warehouses. Only 20 minutes to downtown Atlanta, and 15 minutes to Atlanta Municipal Airport with 370 flights daily. 1 to 30 acre sites ready to build on at attractive prices.

Investigate this established district for manufacturing warehousing and sales office. Small plants and warehouses ready and being completed for lease. Serve the Southeast profitably from the Ponce de Leon Industrial District. Everybody likes it in Atlanta!

For particulars write: F. Wm. Broome, Industrial Manager  
Telephone 378 3691 — P. O. Drawer 759 — Atlanta 22, Georgia

## KENTUCKY

The recently-elected governor of Kentucky is Bert T. Combs, Democrat.

The 1958 census indicates a population for Kentucky of 3,038,000, up from 2,945,000 in 1950, 2,846,000 in 1940, 2,615,000 in 1930 and 2,417,000 in 1920.

Kentucky ranks third among Southern states in the manufacture of tobacco products, non-electrical machinery and electrical machinery. It ranks fourth in the production of leather goods and fifth in fabricated metals.

New plants announcements in the course of 1960 for the state include the Emerson Electric's \$2 million plant in Russellville to make fractional motors and to employ 550 people. In Eminence, Brunswick

(C) 100-250 EMPLOYEES (D) 250-1000 EMPLOYEES (E) OVER 1000 EMPLOYEES \* REGISTERED COMMUNITY AUDIT

## KENTUCKY

Corporation is putting up a 166,400-square-foot plant to employ 400 making sporting equipment. In Carrollton, Eison Brothers are putting up a furniture plant to employ 500. Large chemical installations in the state include American Rubber and Chemical's polybutadiene plant to cost \$10 million at Louisville, and Hooker Chemical's South Shore Plant to make synthetic phenol.

The principal mineral resources of Kentucky are coal, petroleum, natural gas, limestone, fluorspar, clay, glass sands, and construction sands and gravel. In value of mineral output, the state ranks fifth among the sixteen Southern states and eighth in the nation; in coal alone it is the nation's third largest producer. The most important agricultural products are tobacco, livestock and corn. Timber is another leading resource.

### LEADING INDUSTRIES

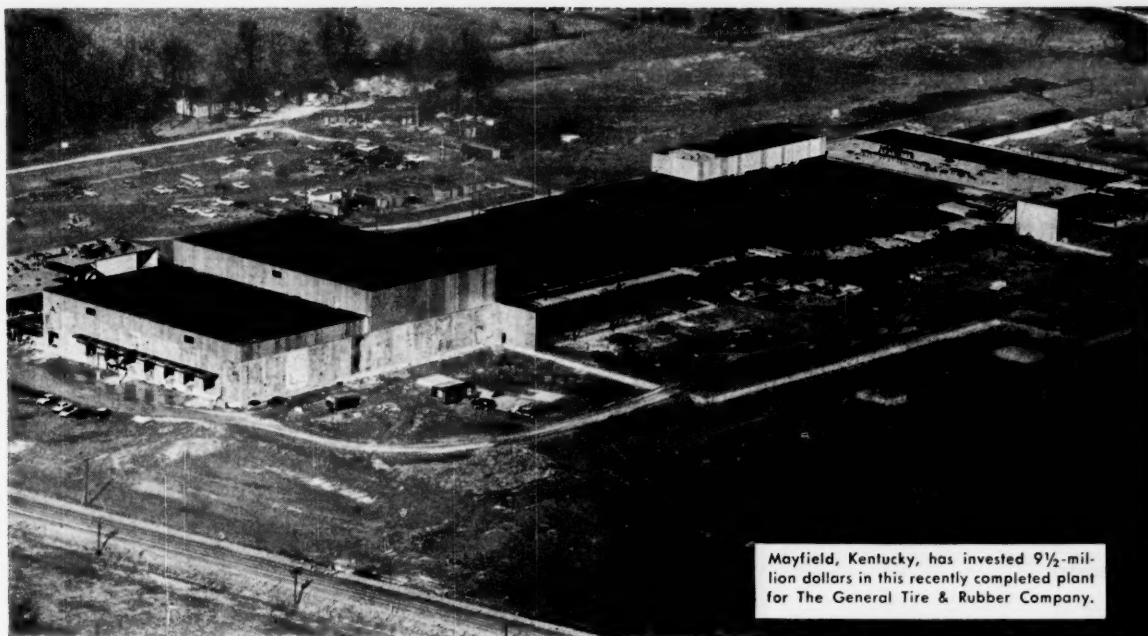

The following list of Kentucky manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Kentucky Department of Economic Development, in Frankfort, and various chambers of commerce and local development groups throughout the state.

Mayfield, Kentucky, has invested 9½-million dollars in this recently completed plant for The General Tire & Rubber Company.

## KENTUCKY offers more industrial FINANCING PLANS than any other state!

**T**HANKS partly to Kentucky's natural advantages, and partly to its *unique* combination of new-plant financing plans to supplement the usual commercial financing, more great and successful companies are now negotiating or building new plants in this fast-growing State than ever before in history.

A \$9,500,000 plant has just been built in Mayfield, Kentucky, for The General Tire & Rubber Company — financed through the issuance of industrial revenue bonds. Other large new plants have similarly been built or are now building in Danville, Franklin, Eminence, Lebanon, and Bowling Green, for Genesco, Inc., Potter & Brumfield Division of American Machine & Foundry Company, Red Head Division of Brunswick Corporation, Swift and Company, and Bowling Green Manufacturing Company, subsidiary of Holley Carburetor Company.

*And, just this year, Kentucky has created two additional sources of industrial financing (one from public funds and one from private funds) which now give Kentucky an unmatched "complete line" of different financing plans:*

1. **Industrial Development Finance Authority:** The 1960 General Assembly, for the first time, appropriated funds which can be loaned to local non-profit industrial development agencies to finance industrial subdivisions and plants.
2. **Business Development Corporation:** This is a company organized to make loans to new industries or to existing industries for expansion. It is privately managed and is privately financed by banks, insurance companies, utility and transportation companies, and other private corporations interested in Kentucky's economic expansion. Most Kentucky financial institutions have already subscribed to its stock and lending funds.

Would your company like to consider the advantages of financing a Kentucky operation? We would feel privileged to send you full details and recommendations. Your inquiry will be held in strictest confidence. Address:

Lieutenant Governor Wilson W. Wyatt, or  
E. B. Kennedy, Commissioner,  
Department of Economic Development  
600 State Capitol Building, Frankfort, Kentucky

## LOUISIANA

Jimmie H. Davis, Democrat, is the new governor of Louisiana.

The 1960 population in Louisiana is 3,257,000, up from 2,684,000 in 1950, 2,364,000 in 1940, 2,102,000 in 1930, and 1,799,000 in 1920.

Louisiana ranks second among Southern states in the manufacture of pulp and paper goods and products of petroleum and coal. It ranks fifth in the manufacture of chemicals and sixth in food and beverage items.

Among the more important plants announced for the state in 1960 is the Goliad gas processing plant at Vermilion to cost \$3½ million and to employ 225. Other large plants are Noralyn Paper Mills at Bueche to produce newsprint and to cost \$35 million, Hercules Powder's Lake Charles plant to produce poly-

propylene and to cost in the multi-million range, and Air Reduction Sales' Baton Rouge plant to produce liquified industrial gases and to cost \$2 million.

Chief raw materials are cotton, rice and sugar cane, petroleum and sulphur. The state holds third rank in the Nation in production of crude oil, being led only by Texas and California. New Orleans is one of the leading ports of the United States.

## LEADING INDUSTRIES

The following list of Louisiana manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Louisiana Department of Commerce and Industry, in Baton Rouge; various chambers of commerce and local development groups throughout the state.

## LOUISIANA /where climate is a lot more than "weather"

You'll find weather everywhere, but *Industrial Climate* is another matter. Investigate Louisiana's excellent *Climate* for business and industry, both large and small, established or projected. Get the facts on Louisiana's ample, top-stability labor force that gives a good day's work for a day's pay...our forests and fertile farmland...industrial sites offering up to several billions of gallons of fresh water per hour...deepwater, river and Intracoastal shipping. And remember Louisiana's big oil and gas, salt and sulphur reserves...pipelines and electric power transmission systems that deliver energy where it's needed. Most important of all, however,

are the people of Louisiana. In every phase of the state's *Industrial Climate*, it has been the people who supplied the initiative. They encouraged creation of the Louisiana Department of Commerce and Industry in 1936 and backed its pioneering 10-year ad valorem industrial tax exemption. You will like them—they speak your language, and they didn't learn it yesterday. Yes, *Climate* means much more than "Weather" in Louisiana. It is a conviction, a frame of mind that is producing the brightest new look on the industrial scene.

Every section of Louisiana has: SIZABLE COMMERCIAL CENTER / ABUNDANT FRESH WATER / ACCREDITED UNIVERSITY OR COLLEGES / TRADE SCHOOLS (Louisiana will train the labor you need) / GOOD RAIL, AIR, HIGHWAY TRANSPORTATION / LOW COST ELECTRIC POWER, NATURAL GAS AND PETROLEUM PRODUCTS

**A greatly varied range of businesses and industries enjoy Louisiana's favorable "Industrial Climate" NOW.**

## MARYLAND

Maryland's 1960 population is 3,101,000, up from 2,343,000 in 1950, 1,821,000 in 1940, 1,632,000 in 1930 and 1,450,000 in 1920.

Maryland leads Southern states in the manufacture of rubber goods; it ranks second in primary metals, transportation equipment and miscellaneous manufactures including ordnance. It ranks third in the manufacture of food and beverages, fabricated metals and instruments and fourth in printing & publish-

(C) 100-250 EMPLOYEES (D) 250-1000 EMPLOYEES (E) OVER 1000 EMPLOYEES \* REGISTERED COMMUNITY AUDIT

## MARYLAND

ing, non-electrical machinery and electrical machinery.

The present governor of Maryland is J. Millard Tawes, Democrat.

The leading new plant announced in the course of 1960 is the Hagerstown plant of Mack Trucks, to employ 2,000 in a building measuring 1 million square feet. In Elkton the General Cable Corporation is putting up a 100,000 square-foot plant to produce wire and cable and to employ 300. U.S. Gypsum is putting up a construction materials plant to employ 120 in Baltimore.

The state is divided into nearly equal halves by the Fall Line, which enters the state at the northeast corner and runs through Baltimore and Washington.

Southeast of the Fall Line is the Coastal Plain surrounding the upper portion of Chesapeake Bay. It is an important agricultural area, especially for truck crops and poultry.

Just beyond Baltimore and Washington extends the Piedmont, a prosperous dairying area. Beyond Frederick the western end of the state is a series of northeast-southwest ridges of the Appalachians with intervening valleys.

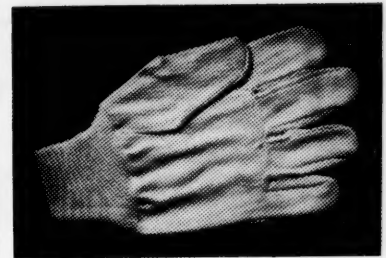

Most of the population is concentrated in the Baltimore and Washington metropolitan areas. Baltimore is one of the nation's leading ports and is the largest manufacturing center in the South.

### LEADING INDUSTRIES

The following list of Maryland manufacturers employing over 100 has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Maryland Department of Economic Development, in Annapolis, and various chambers of commerce and local development groups throughout the state.

# WE're ready to go to WORK for YOU!

In our first year (1960) we answered inquiries from 62 businesses and industries looking for new plant locations. Some chose Maryland sites. We think — once you know the facts — you'll be interested in Maryland, too. Our job is to supply the facts.

### LET US TELL YOU:

About Maryland's variety of sites — industrial parks, deepwater and rail connected sites. We'll be glad to make all the arrangements for you to inspect them.

About Maryland's ample power; industrial water; air, rail and waterborne transportation facilities; about our present and proposed highway network.

About Maryland's labor pool; skilled and semi-skilled workers; highly trained technicians and scientific personnel; about our science oriented universities and colleges.

About Maryland's laws, taxes and climate; surface and ground water resources; about local planning and zoning, schools, churches, hospitals and recreational facilities.

About Maryland's 3½ billion dollar banking community.

We'll even supply the pollen count or the turkey census if that's what you want.

LET US TELL YOU ABOUT MARYLAND —  
WE'RE EXPERTS!

# MARYLAND

DEPARTMENT OF  
ECONOMIC DEVELOPMENT  
STATE OFFICE BLDG. ANNAPOLIS, MD.

J. Millard Tawes, Governor  
George W. Hubley, Jr., Director

## MISSISSIPPI

Ross R. Barnett,  
Democrat, is the  
newly-elected gov-  
ernor of Mississippi.

The 1960 population of Mississippi was 2,178,000; in earlier census the total was 2,179,000 in 1950, 2,184,000 in 1940, 2,010,000 in 1930 and 1,791,000 in 1920.

Mississippi ranks sixth among Southern states in the manufacture of apparel and of lumber and wood products. It ranks eighth in the production of textiles, furniture, rubber products, electrical machinery and transportation equipment.

New plants announced for the state in 1960 include the American Bilt-Rite rubber sole plant at Ripley to cost \$3 million and to employ 400. In Greenville, Atkins Saw

## MISSISSIPPI

put up a \$2 million plant to employ 500 in the production of saws. The Booneville plant of American Seating will cost \$1.6 million and employ 300 in the production of church furniture. Baldwin Piano put up a \$6 million plant for piano and organ cases in Greenwood to employ 250. The Wurlitzer Company in Holly Springs will cost \$500,000 and employ 300 in the production of musical instrument components. The \$4,000,000 plant of Mississippi Pulp and Paper at Foxworth will employ 125. The Magnolia plant of Flintkote, to make containers and building products runs into the multi-million dollar range and employs between 150 and 200.

Chief minerals are petroleum and natural gas, found mainly in the south.

### LEADING INDUSTRIES

The following list of Mississippi manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Mississippi Agricultural and Industrial Board, in Jackson, the Mississippi Industrial and Technological Research Commission, also in Jackson, and the North Mississippi Industrial Commission in West Point. Various chambers of commerce and local development groups throughout the state also contributed.

## Mississippi's New

# BILL OF RIGHTS

### FOR BUSINESS AND INDUSTRY

The Mississippi legislature recently enacted 39 laws vastly improving our "business climate" and offering important incentives to industry. Key legislation includes:

- **REDUCTION OF STATE INCOME TAX**  
To be reduced each year from present 6% down to a 3% base in 1966.
- **WORKMEN'S COMPENSATION REVISIONS**  
Changes make law fairer; savings reflected in premiums paid by industry.
- **"RIGHT-TO-WORK" LAW**  
Mississippians voted more than 2 to 1 to make 1955 law part of constitution.
- **INDUSTRIAL REVENUE BONDS**  
Political subdivisions can issue revenue bonds for land, plants and equipment.
- **WAREHOUSING & DISTRIBUTION**  
"Free Port" warehouse or in-transit warehouse free from ad valorem taxes.
- **RESEARCH**  
State research commission created to conduct economic and scientific studies.
- **EDUCATION**  
Special study committee created to map state's future education approach.

THE PEOPLE OF MISSISSIPPI HAVE DEMONSTRATED THEIR COMMITMENT TO INDUSTRIAL PROGRESS

for details, in confidence, contact Joe Box, Director Department of Industrial Development

## SOUTHEAST MISSISSIPPI

....the South's fastest  
growing market

Mississippi Power Company is growing with this fast-growing area of the aggressive South. Three modern steam-electric generating plants, plus an interconnected high voltage transmission network with the vast Southern Company system, assures industry of a plentiful and dependable supply of electric power. Add to this, abundant raw materials, mild climate, intelligent labor and excellent transportation facilities, including deep water ports. There's plenty of opportunity for your operation in Southeast Mississippi.

# Water

If you need water or water transportation  
in your industrial operation, then you should  
know more about:

## BILOXI MISSISSIPPI

- Located on the Gulf
- Deep water channels
- Surrounded by back bay areas and rivers
- Multi-million dollar back bay waterway system under construction will provide many new and excellent industrial sites
- Strategically located to serve Southern and South American markets

**BILOXI IS A  
GOOD PLACE TO LIVE**

Semi-tropical climate makes this vacation wonderland a perfect place to live and work. Add to this an abundant supply of power, willing workers and good transportation facilities. Look closely at Biloxi for your plant relocation or expansion.

Pittsburgh Plate Glass wanted

## Community Cooperation

"We found this vital ingredient for successful operations in abundance at our new fiber glass plant in North Carolina."

*Robert A. McLaughlin, General Manager,  
Fiber Glass Division*

Western Electric wanted

## Productive Labor

"In our three manufacturing plants in North Carolina, we have found that labor is plentiful, productive, and quick to learn new skills and to understand the importance of quality."

*W. S. Yeager, Manager of the North Carolina Works*

Gerber wanted

## Materials and Markets

"In North Carolina we found a dependable source of top quality produce combined with close proximity to the fast-growing market in the Southeast for our baby foods."

*Daniel F. Gerber, President*

Riegel Paper wanted

## Timber and Water

"As a major producer of pulp and paper, we are pleased with the vast resources in good timber and clean water available for our big manufacturing facility."

*John L. Riegel, Chairman of the Board*

Chemstrand  
(Research Center Inc.) wanted

## Research Resources

"North Carolina's new Research Triangle Park, surrounded by three great universities, provides a unique location and productive climate for our new Research Center."

*Dr. David W. Chaney, Executive Director*

Communicate in confidence with  
Governor Terry Sanford, Chairman  
of the Board of Conservation and  
Development, Raleigh.

The average Piedmont Carolinian is vigorous and young — still in his twenties. Transferred to industry by the rapid mechanization of agriculture, his new hours leave him time to enjoy his own outdoors. Mild climate favors his liking for field and stream (favors you, too, in lower production costs). Fine roads interlacing Piedmont communities take him quickly from farm to factory. He's proud of the high production records he helps you set. His hearty "How're we doing, Boss?" may surprise you at first. To him it's natural, for your plant is part of his community, and he expects to be with you a long time. He wants to help you grow.

# **DUKE POWER COMPANY**

**GENERAL OFFICES: CHARLOTTE, NORTH CAROLINA**

## **YOU BENEFIT THREE WAYS**

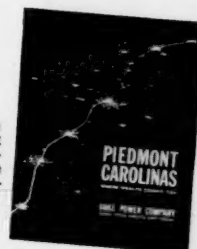

**FROM LAND-OWNING WORKERS  
IN YOUR PLANT**

- HIGHER PRODUCTION
- LOWER ABSENTEEISM
- MINIMUM TURNOVER

Two out of three Carolinians live in rural areas, yet the Carolinas have the greatest percentage of manufacturing employees outside the northeastern states.

For the complete exciting story in pictures and to-the-point text, let us send you free copy of new brochure, "Piedmont Carolinas, Where Wealth Awaits You". Write Industrial Development Department,

Duke Power Company

## For Industrialists — High Point, N. C.

(1960 population — 62,063)

High Point has the ideal combination of MARKETS, MATERIALS and LABOR. Excellent transportation facilities, ample power and water, industrial parks.

25 mile radius trade population 375,000. Fine climate, progressive city administration, excellent schools, recreational facilities. Write for complete information,

Phil Clarke, Manager — Industrial Development Division

## HIGH POINT CHAMBER OF COMMERCE

HIGH POINT, NORTH CAROLINA

## A Professional Approach...

PLANNED TO MEET  
GROWTH REQUIREMENTS

- Analysis of Present Operations
- Reports and Recommendations
- Plans and Specifications

plant rearrangement  
plant expansion  
new plant

- Construction Management

## OKLAHOMA

Oklahoma's population in 1960 reached 2,328,000. In earlier census the totals were 2,233,000 in 1950, 2,336,000 in 1940, 2,396,000 in 1930 and 2,028,000 in 1920.

Oklahoma ranks second among Southern states in the manufacture of non-electrical machinery, third in petroleum and coal products, and sixth in instruments, and seventh in

rubber products and transportation equipment.

Oklahoma's present governor is J. Howard Edmondson, Democrat.

New plants reported in the course of 1960 for the state include a 60,000 square foot plant to make heat exchangers in Tulsa. The firm is the Yuba-Tulsa Corporation and it employs 400. In Ardmore, a \$200,000 plant to employ 400 was put up by Black, Sivalls and Bryson to make oil field equipment. In Miami, the Crane Company put up a 150,000-square-foot plant to produce heating and air conditioning equipment and to employ 325. The Lone Star Brewing Company has announced a \$500,000 brewery for Oklahoma City.

Oklahoma is mostly a rolling prairie, but with the exception that the extreme eastern part contains low parts of the Ozark and Ouachita Mountains. These are covered with dense forests and in part contain rich oil deposits. Most of the rest of the state is made up of large ranches engaged in cattle raising or in extensive wheat and cotton farms.

### LEADING INDUSTRIES

The following list of Oklahoma manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in compiling data for BLUE BOOK files were the Oklahoma Department of Commerce and Industry, in Oklahoma City, and various chambers of commerce and local development groups throughout the state.

**Ada**

## SOUTH CAROLINA

E. L. Hollings, Democrat, is South Carolina's present governor.

South Carolina has a 1960 population of 2,383,000 according to the recent census. In previous census the totals were 2,117,000 for 1950, 1,900,000 for 1940, 1,739,000 for 1930 and 1,684,000 for 1920.

Recent data indicate that South Carolina ranks second among Southern states in textile manufacturing and fifth in the manufacture of tobacco products and apparel.

New plants announced for the state in 1960 include Allied Chemical at Irmo (nylon, \$35 million, 4,000 employees), Shuron Optical Lens at Barnwell (bi- and tri-focal lens, \$5 million, 500 employees), Electro Motive Manufacturing at Florence (electronic items, \$5 million, 450 employees), Clark Schwebel Fiber Glass at Anderson (research laboratory and manufacturing, \$3 million, 300 employees), Argus Cameras at West Columbia (projectors, 110,000 square feet, 300 employees), and Dunlop Tire and Rubber at Westminster (golf balls, \$1¼ million, 250 employees).

Topographically, the eastern two-thirds of the state is a coastal plain, with large portions covered with forest. From this plain the land level rises gradually to the Piedmont region in the northwest.

## LEADING INDUSTRIES

The following list of South Carolina manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for

BLUE BOOK files were the South Carolina State Development Board, in Columbia, and chambers of commerce and local development groups throughout the state.

## FOR YOUR PROJECT...

## A FIRM OF CONSULTING ENGINEERS? A PROFESSIONAL ENGINEERING FIRM? AN INDEPENDENT FIRM OF ENGINEERS?

What's in the name? Everything —when it comes to the engineering of the industrial building project. Whether you call it a firm of consulting engineers . . . or a professional engineering firm . . . or an independent firm of engineers—it describes that kind of organization dedicated to the undivided purpose of best representing your interests at every phase of your modernization or expansion program.

YOU CAN EXPECT THE ENGINEERING FIRM YOU CHOOSE TO

- ... study and help you select the best possible site for your new plant
- ... define and cost-estimate every phase of the project in advance of contractual agreements
- ... provide complete and comprehensive plans and specifications
- ... submit analyses of competitive bids obtained to assist your staff in contractor selection
- ... ensure your prerogative to make the type of contract most advantageous to your project needs
- ... assume resident engineering supervision of project construction to represent your interest solely
- ... REALIZE A LOW COST, HIGH EFFICIENCY OPERATION TO MEET YOUR MOST RIGID BUILDING REQUIREMENTS — AT AN ESTABLISHED SERVICE FEE

J. E. Serrine Company offers complete professional engineering services . . . rendered in the sole interest of its clients.

**J. E. SIRRINE COMPANY**

# TRAILBLAZING

1961 STYLE

Since breastplated Spaniards landed on its shores four centuries ago, men have admired the rich and beautiful land of South Carolina as a frontier of opportunity. Today that potential is being developed more rapidly than ever along the trail blazed by South Carolina Electric & Gas Company. With slide rules and research figures its engineers have carved wide paths upon which industry can follow with confidence into any part of SCEGCO's 23-county service area. Such carefully calculated pioneering has been largely responsible for the state's tremendous industrial surge. It appears that the expansion is just beginning, but trailblazers at South Carolina Electric & Gas Company are far ahead in preparing for low-cost electric power and natural gas availability — no matter how extensive the progress.

## TENNESSEE

The governor of Tennessee is Buford Ellington.

Tennessee's 1960 population, according to the census, is 3,567,000. In earlier census, the totals were 3,292,000 for 1950, 2,916,000 for 1940, 2,617,000 for 1930, and 2,338,000 for 1920.

Tennessee ranks first among Southern states in the manufacture of shoes and other leather goods. It ranks second in the South in apparel manufacturing, chemicals, fabricated metals, and instruments. It ranks third in furniture production and printing and publishing, and fourth in rubber goods, the stone-clay-glass group, and miscellaneous items including ordnance.

(C) 100-250 EMPLOYEES (D) 250-1000 EMPLOYEES (E) OVER 1000 EMPLOYEES \* REGISTERED COMMUNITY AUDIT

## TENNESSEE

New plants announced for the Volunteer State in 1960 include Gates Rubber at Nashville (tires, \$15 million, 2,000 employees), American Biltrite Rubber at Hohenwald (fire hose, \$3 million, 400-500 employees), Foote Mineral at New Johnsonville (electrolytic manganese, multi-million dollars, 400 employees), Detroit Gasket Manufacturing at Newport (gaskets, 68,000 square feet, 400 employees), Shulton at Memphis (toiletries, 111,500 square feet, 250 employees), and Shwayder Brothers at Murfreesboro (card tables and chairs, up to 600,000 square feet, 150 employees).

Tennessee divides naturally into three regions. In eastern Tennessee are two mountain ranges, the Great Smokies, and the Cumberlands with the Valley of East Tennessee River between them.

Central Tennessee is a high plateau surrounded by other highlands, rich in good farm lands and in raw materials of many kinds. Western Tennessee lies in the Mississippi River Valley confines and is low-lying cotton country.

### LEADING INDUSTRIES

The following list of Tennessee Manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Tennessee Department of Conservation and Commerce in Nashville and various chambers of commerce and local development groups throughout the state.

# Manufacturing Firms Invest \$354,721,000 in New Plants and Expansions in Tennessee

## 308 NEW INDUSTRIES AND 410 EXPANSIONS IN 1959-60

This record, one of the best in the nation, didn't result from chance. The 718 business firms which established new industries or expanded their operations in Tennessee considered every factor before making their decisions. The plus values they found are equally open to you.

### If you are considering Branch Plants or Warehouses in the South — check these Tennessee Advantages

**CENTRAL LOCATION** with rail, water, highway and air transportation makes Tennessee an ideal geographical location for national distribution.

**LOW CONSTRUCTION COSTS** — low as \$5.50 per square foot for a new, modern plant, air-conditioned throughout.

**GOOD TOWNS AND AMPLE LABOR.** 275 cities and towns, including four large metropolitan cities, offer a wide choice of plant sites and an abundant supply of easily trained workers — both men and women.

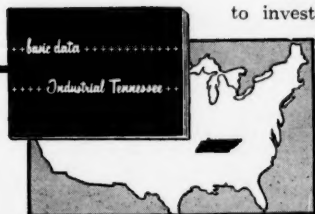

**LOW-COST POWER** with electricity as low as 6.03 mills per kwh. Also coal, fuel oil, natural gas — and abundant water supplies.

**STATE-SPONSORED FINANCING.** Tennessee cities and towns are authorized by the Legislature to issue full faith and credit bonds to finance buildings for industry. Private funds also are available.

**FINE GOVERNMENTAL CLIMATE,** highly favorable to industry. Under Gov. Buford Ellington the State has a balanced budget, no personal income tax, a dynamic industrial development program, and has cut the use tax on production machinery from 3% to 1% to encourage industry.

**TOOL AND DIE SHOPS** — the South's largest concentration of tool and die shops for metal working industries.

**FULL DETAILS** regarding Tennessee plant sites and other industrial advantages will be mailed promptly upon request. The Industrial Development Division will also be glad to present specific proposals based on your particular needs, and assign an experienced man to work with you and accompany interested executives to communities they wish to investigate. There's no obligation and inquiries will be held in strict confidence.

*Site-seeking industry take note:* Here is a choice location which merits your immediate investigation — the Memphis Harbor and Industrial Area. This photo shows only a portion of the 960-acre development where 45 industries are now located. Acreage in the Memphis Harbor and Industrial Area is readily available and offers properties with or without water frontage.

This planned industrial development is only ten minutes from downtown Memphis.

Memphis' strategic location, on the mighty Mississippi at the hub of Mid-South rail and

truck activity, provides ready access to the major markets of the Nation. A public \$1,400,000 River-Rail-Truck Terminal on the still-water harbor is at your service. Direct freight connections can be made to seven major trunk line railroads, five scheduled service barge lines, 91 motor freight lines and eight commercial air lines.

Memphis has a lower combined cost of electricity, natural gas, water, taxes and insurance than any comparable city in the Nation. There are a multitude of other reasons, too. For the full story clip and mail the coupon today.

## TEXAS

The governor of Texas is Price Daniel, Democrat.

The 1960 population of Texas was 9,580,000, as compared to 7,711,000 in 1950, 6,415,000 in 1940, 5,825,000 in 1930 and 4,663,000 in 1920.

Texas is the leading industrial state in the South. It ranks first among Southern states in employment in the following lines of manufacture: food and beverages; printing and publishing; chemicals; petroleum and coal products; stone, clay and glass products; fabricated metals, non-electrical machinery; transportation equipment and instruments. It is second in electrical machinery and third in apparel, rubber goods, and miscellaneous items including ordnance.

Some of the more important plants announced in the course of 1960 are the Rexall Drug and Chemical plant at Odessa (olefins and other chemicals, \$71 million, 800 employees), Anheuser-Busch Brewery at Houston (\$30 million, 700 employees), Chance Vought Aircraft at Arlington (electronic equipment for missile tracking, \$15 mil-

lion, 300 employees), Goodyear Tire and Rubber's multi-million dollar plant at Beaumont (synthetic rubber, 300 employees), Republic Odin plant at Dallas (hot water heaters, 160,000 square feet, 300 employees) and Keasbey-Mattison's \$5 million insulation plant at Hillsboro (130 employees).

More than two-thirds of the counties are or have been oil producers; main production now centers in the Permian Basin surrounding the southeast corner of New Mexico. Natural gas is widely distributed and oil and gas pipelines criss-cross the state.

### LEADING INDUSTRIES

The following list of Texas Manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the Bureau of Business Research of the University of Texas, in Austin, and various chambers of commerce and local development groups throughout the state.

## Let Us Give You The Facts About The Opportunity Frontier of Texas

Expanding business and industrial horizons are opening new doors to progress in The Opportunity Frontier of Texas, most of which is served by Texas Electric Service Company. This area, the geographical center of the rapidly expanding Southwest market, has excellent transportation facilities, a strong diversified economy, a wealth of petroleum and other natural resources, a genial climate, cooperative and progressive communities and plenty of dependable low-cost electric power.

### *The Opportunity Frontier*

Complete, on-the-spot information is readily available to you from our Area Development Department concerning the rapidly growing North Central and West Texas area we serve in The Opportunity Frontier of Texas.

*Ask us for the specific information you need regarding:*

- MARKETS
- MANPOWER
- POWER AND UTILITIES
- RESOURCES
- TRANSPORTATION
- PLANT SITES

Texas Electric's Area Development Department has years of experience in working with business and industry, and will be glad to provide you efficient research and accurate information about the area served.

Let Us "Brief"  
You on Texas

It's difficult for a Texan to be brief because the state offers so much to industry ... but TP&L's industrial consultants are ready and willing to brief you on all subjects pertaining to plant location problems... in your own office... anytime... any place. No obligation... Strictly confidential.

Write, wire or phone J. D. Eppright, Director Industrial Development Division, for an appointment.

Virginia ranks second among the Southern states in the manufacture of tobacco products, furniture and leather goods. It ranks third in chemical products and fourth in transportation equipment.

Leading plants announced during the course of 1960 were Robertshaw-Fulton Control's headquarters at Richmond to employ 1,000 people; the Poly-Scientific Corporation at Blacksburg (electronic components, \$350,000, 300 employees); Dow Chemical's multi-million-dollar nylon plant at Lee Hall (250 employees); the Craddock-Terry Shoe plant at Lawrenceville (\$500,000, 300 employees); Corning Glass plant at Danville (specialty glass, 190,000 square feet, up to 250 employees).

The eastern part of Virginia is the Tidewater area, a coastal plain cut into long peninsulas by rivers flowing to Chesapeake Bay.

Beyond the Fall Line cities extends the Piedmont, a rolling plateau rising gradually to the Blue Ridge.

The Blue Ridge Mountains contain the famous Shenandoah National Park and are followed for most of their length by Skyline Drive.

Beyond lies the narrow but productive Shenandoah Valley and its southward continuation.

### LEADING INDUSTRIES

The following list of Virginia manufacturers employing more than 100 workers has been compiled from many sources. Those particularly helpful in providing data from BLUE BOOK files was the Virginia Department of Conservation of Economic Development, in Richmond, and various chambers of commerce and local development groups throughout the state.

## VIRGINIA

Virginia's governor is J. Lindsay Almond, Jr., Democrat.

The 1960 census showed a population in Virginia of 3,967,000 as compared to 3,319,000 in 1950; 2,678,000 in 1940; 2,422,000 in 1930; 2,309,000 in 1920.

# THERE'S A PROFIT-MAKING SITE FOR your plant in VIRGINIA

Virginia's uncrowded 40,815 square mile area offers numerous factors which industries depend upon for profit-making operations . . . .

- easy access to raw materials, equipment and supplies
- rich bituminous coal fields
- plentiful sources of industrial water, electric power, natural gas
- top-grade transportation
- extensive beds of limestone, dolomite and timber
- mild year-round climate
- quality labor force
- friendly, efficient local and state government

Add to these factors a proven labor-management harmony, encouraged by a State Right-to-Work Law, and you have in Virginia an ideal state for industry — a wonderful place to live, to work and make money!

For more facts, or for help in locating a plant site to meet your specific manufacturing requirements — write, wire, phone or visit in complete confidence . . .

C. M. Nicholson, Jr., Commissioner  
Division of Industrial Development and Planning  
**Virginia Dept. of Conservation  
and Economic Development**

## WEST VIRGINIA

William W. Barron, a Democrat, is the current Governor of the state.

West Virginia's population in 1960 was 1,860,000; in earlier census the totals were 2,006,000 in 1950; 1,902,000 in 1940; 1,729,000 in 1930 and 1,464,000 in 1920.

West Virginia ranks second among the southern states in the manufacture of stone, clay and glass products; third in primary metals; fourth in chemicals and sixth in petroleum and coal products.

One of the leading new plants announced for West Virginia in 1960 was Novamont Corporation, a subsidiary of Montecatini chemical, the large Italian combine, at Kenova; the plant will cost \$10 million and use 200 employees to produce plastics. Union Carbide is putting up a multi-million-dollar laboratory at South Charleston to measure 130,000 square feet. Sterling Enterprises is putting up a feed processing plant at Manheim to employ 150 employees and to cost \$350,000. Baby World will employ up to 250 at Grafton in the production of plastic toys.

Most of West Virginia lies in the Allegheny Plateau, heavily dissected by rivers draining to the Ohio, and underlain by huge coal deposits. Parallel ridges and valleys of the Appalachians, including part of the Shenandoah Valley make up the eastern part of the state.

## LEADING INDUSTRIES

The following list of West Virginia manufacturers employing over 100 workers has been compiled from many sources. Those particularly helpful in providing data for BLUE BOOK files were the West Virginia Industrial and Publicity Commission, in Charleston, and various chambers of commerce and local development groups throughout the state.

CLOVER CREAMERY CO. (C)	UNITED ELASTIC CORP. (E)

## the Future is Here

Are you trying to determine what to do about the future? Because of an exceptional combination of advantages a spot in West Virginia was selected as the site of the largest fixed movable object ever built, the U. S. Navy's radio telescope at Sugar Grove, W. Va., tall as a 60-story building.

The future needs of your company are undoubtedly quite unlike those required by such a scientific installation. But look as you will, even to tuning in on celestial bodies, few areas possess the exceptional combination of industrial assets which West Virginia offers you.

West Virginia is near people . . . more than half the population of the country is within 500 miles. It is near four of the five biggest markets.

West Virginia can provide a versatile working force, one which can be, and even will be, trained for your particular requirements and needs.

West Virginia is the biggest producer of bituminous coal, which great power plants transform into electricity; it has natural gas, and other natural resources which give the State diversified production.

If your plant can benefit by a location near the chemical groups, metal manufacturers, or near ample lumber, your future in West Virginia has a splendid prospect.

In the expanding 60's West Virginia offers exceptional opportunities. Let us hear from you. Address Commissioner, West Virginia Department of Commerce, Room 19, State Capitol, Charleston 5, West Virginia.

## From the South: \$229,578,426

As a yearly feature a national publication compiles advertising statistics from advertising agencies across the broad United States. In such report for 1960, a total of 677 advertising agencies participated with figures. They reflect interesting information on the South, as well as other regions of the nation.

Of the 677 agencies reporting, 58 were located in the South, and according to our additions they billed last year a total of \$229,578,426. (Compared with this showing, 57 agencies reported from the West with a total of \$115,170,531.)

Southern Advertising and Publishing covers the following states: Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia. This is one of the fastest growing regions industrially in the United States. On many indices it leads the nation.

The 58 advertising agencies in this report are by no means all the agencies in the South (of which there are more than 1,000) but only these that reported are counted. The same yardstick applies to the West, of course, embracing 11 Western States, which also is a vigorous part of the nation ... Still, the comparisons are interesting. Here they are again:

No. of Agencies	Total Billing
From the West, 57	\$115,170,531
From the South, 58	229,578,426

## IMPROVE BUSINESS CLIMATE AND HELP INCREASE PROFIT

Most progressive firms are vitally interested in improving the business climate in the communities in which they operate branch offices or plants. The business climate, although intangible, can help or hurt your opportunities for profit.

A unique and relatively inexpensive technique you can use to help improve the business climate in your communities is now available. This method is aimed at helping your communities help themselves: You donate to the chambers of commerce of the communities in which you operate facilities a new handbook, the AREA DEVELOPMENT GUIDE. This practical handbook covers such subjects as community improvement, industrial development and area promotion and can be easily used as an outline for action for community development. Thus, you place in the hands of the community leaders one of the tools which can be used to improve your business climate.

**FOR FREE DETAILS, MAIL THIS COUPON TODAY!**

Please send, **without obligation**, further information on how AREA DEVELOPMENT GUIDE can be used to help improve the general business climate.

## STANDOUT GROWTH AREA

### Served by an Outstanding Railroad

This productive central region sets the pace for southern industrial growth. Those states linked by L & N rails average 11% more manufacturing plants than the South as a whole.

Here is proof that industry finds in the Mid-south the same favorable conditions YOU are looking for—among them, suitable land fairly priced; productive labor; ample fuel, electricity, water; plus a mild climate, pleasant surroundings, and a cooperative political environment.

L & N—one of the nation's great railroads—serves as the Mid-south's artery for both raw materials and finished products. Completely modern, with push-button classification yards, centralized traffic control, and a large fleet of

cars to meet every need, L & N grids the Central South with 5,700 miles of up-to-date transportation system — carries 74,000,000 tons of freight yearly. L & N offers you direct, fast service to distribution centers the country over . . . access to world markets through direct connections to major Gulf ports.

Come to the Central South, where today's continued industrial growth assures still greater business opportunities! L & N will be glad to recommend plant locations that would be tailored to your specific needs. Phone or write: *R. E. Bisha, Director of Industrial Development, Louisville and Nashville Railroad, Louisville 1, Kentucky (JUniper 7-1121, Ext. 318).*

**LOUISVILLE AND NASHVILLE RAILROAD**

*time:* present

*place:* Greenwood, Arkansas, near Ft. Smith

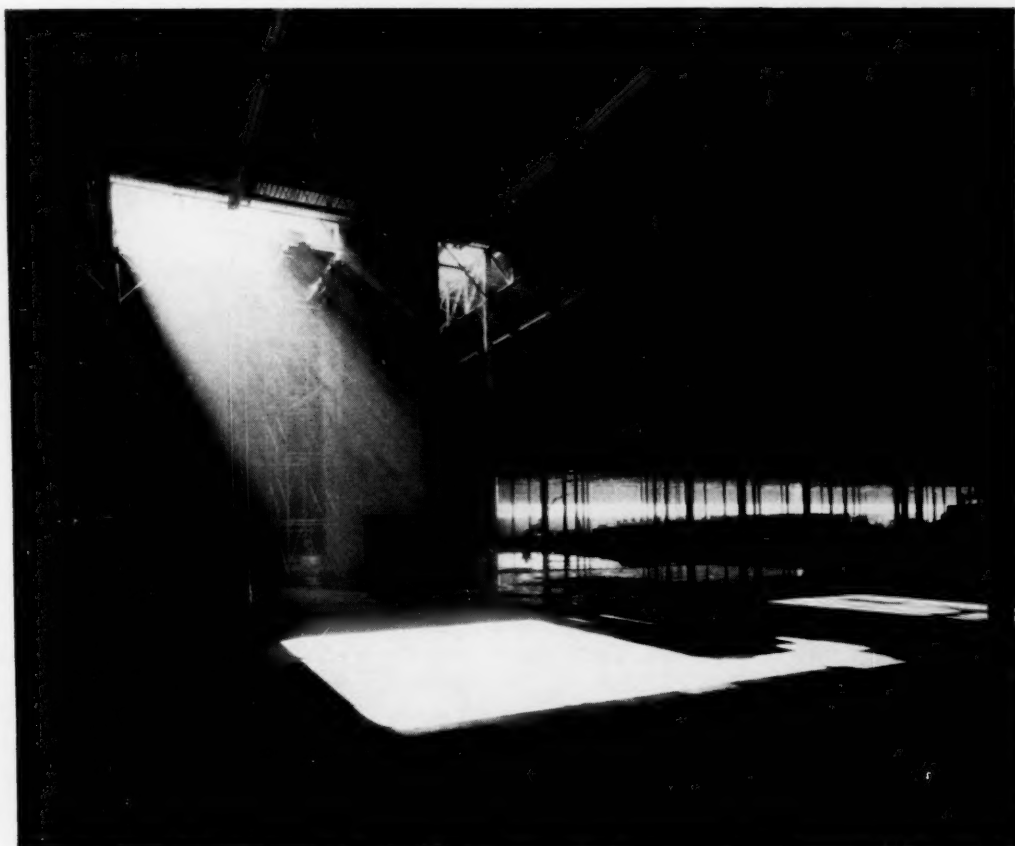

*set:* 1,102,000 sq. ft. plant under construction for the Norge Division of Borg-Warner

*financing:* \$7,500,000 tax exempt bonds voted under Act 9 of 1960

*product:* Norge gas refrigerators and other appliance components

*employment:* 1,500—2,000 initially

*details:* 25 acres under one roof, 60' x 40' bays, 32' clearance, one mile of brick wall 12' high, 300 miles of pipe, 800 drilled piers, 3 spurs-22 car siding inside-20 outside, 12 truck docks, 38 one-ton roof ventilators installed by helicopter
